Researcher: Esteban Puentes

Countries: Chile

Summary: This survey of micro-entrepreneurship builds on a survey taken in 2008. The objective of the survey is to characterize small and medium entrepreneurship activities in Chile. Special attention will be given to the effects of the earthquake and the savings behavior of these households.

Survey Time Frame and Rounds:
- Main Round: October to December 2010
- Follow-up: March to April 2011, early 2010

Modules:
- Household Demographic
- Employment
- Savings
- Borrowing
- Type of Entrepreneurship
- Financial Literacy
- Saving Obstacles and Access to Public Sector Programs

Sample: Self-employed workers and employers in Chile

Survey size: 3,000 households

Intervention: N/A
